STIF, expert in the explosion protection

Founded in 1984, the STIF Group is a French industrial group that designs, manufactures, and markets innovative industrial equipment for niche markets. Initially specialized in handling equipment for bulk products, such as elevator buckets, lifting straps and compression fittings, the family-owned Group has diversified in the last ten years by expanding into passive protection against the risk of industrial dust explosions and since 2022 in the field of explosion protection for battery energy storage systems (BESS). With 189 employees, product ranges listed and recognized worldwide, and three plants in France and Asia, and soon in the USA, the Group intends to become a leader in this sector, which is directly linked to the exponential growth of the renewable energies market.
